

## "S" FAMILY

0, 1, 2, 3, 5, 6 SERIES WITH INCREASING FUNCTIONS

### S FAMILY STILL WINE UP TO 3,000 b/h.

The S family is the result of more than 70 years of experience in the field of medium and small sized wine producers, with high quality, reliable and easy-to-use machines.

This production segment includes very fine wines and represents our most traditional area of activity, which our reputation was created and consolidated on.

A wide range of accessories and extras allows to design machines able to meet the needs of each producer.

#### **SERIES 0 - Filling, inert gas injection and vacuum corking.**

The basic functions for bottling with one kind of closure.

#### **SERIES 1 - De-aeration, filling, inert gas injection and vacuum corking.**

To reduce wine oxidation, the air is removed from the bottles using a high vacuum pump and inert gas is injected, before filling.

#### **SERIES 2 - Filling, inert gas injection, corking and capping.**

#### **SERIES 3 - De-aeration, filling, inert gas injection, corking and capping.**

A single machine with two columns for different types of bottle closure. It is very fast and easy to switch from one kind of closure to another.

#### **SERIES 5 - Rinsing, de-aeration, filling, inert gas injection, vacuum corking.**

This series also includes a rinser, thus allowing to carry out the complete cycle from rinsing to corking.

#### **SERIES 35 - Rinsing, de-aeration, filling, inert gas injection, vacuum corking-capping on a single rotating column.**

This series includes the option of a second bottle closure on the same column of the cork.

#### **SERIES 6 - Rinsing, de-aeration, filling, inert gas injection, vacuum corking, capping.**

Like the 5 Series, it includes the option of adding a column for a second closure according to the customer's needs. The presence of two columns allows to switch from one type of closure to another in a very fast and easy way. This is currently the most complete and popular serie sold by Gai.
